# Right Garbage Can for Your Needs

by Alena Smith

Article published on February 2nd 2012 | Home Improvement

## Touch Free Trash Containers

The most innovative type of Garbage Can to date is the touch-less Garbage Cans. This trash can is ideal for people who do not want to touch the lid of the bin. If your hands are full but need to throw a bunch of waste on the trash can, this one is highly useful. Most touch-free trash cans are equipped with the latest sensor technology that allows the cover to open up when it senses your hands or trash. The lid automatically closes after around 3 seconds when your hands move away from it. Touch-free trash cans come in various sizes that can keep up to 30 gallons of trash bag. Lastly, these Garbage Cans can be plugged in or made functional by using batteries.

## Pedal Trash Containers

Those piano hinges have been incorporated to trash cans nowadays, thus we now have pedal trash cans. All you need to do is to step on the pedal and the tight lids will be lifted. Pedal trash bins have evolved as well that is why we already have different varieties like the two-compartment recycling bin and stainless steel trash cans. A two-compartment step on bin is very useful in sorting your trash. Now you do not need to have two or more separate trash bin to properly segregate your garbage. At the same time, stainless steel pedal Garbage Can have leak-proof design and effectively controls odor. There are also some models of stainless step on trash bins that have non-corrosive base ring to protect the floor.

## Pull Out Trash Containers

There is now a stylish way to keep your trash. Thanks to pull out trash containers, you can now attach the bins inside cabinets. Once you open the cabinet, the trash bin will slide out, all ready to collect your trash. Pull out trash bins include mount slides and other metal components so you can properly install them inside the cabinet. There is also the slide-out version that can be installed on the cabinet door. These garbage cans are highly useful especially if you have dogs and cats that regularly tinkers the garbage cans.

## Trash Bins with Sand Urns

What could be more innovative than a trash container that can minimize or neutralize the garbage odor? Odor-sensitive people would be delighted to find out that there are trash cans with sand urns. The sand helps control the odor from the garbage inside the bin. The bins have removable sand pans that can be maintained easily.

The different types of garbage cans are made for people with varied needs. With the many choices available, you can now keep that trash properly and maintain a cleaner surrounding.
