Amazing Discount offers at Dubai Cosmetic Surgery by [Hassan Zobeen](#)

Article published on July 20th 2012 | [Advertising](#)

However, there are a few things that must be understood about this procedure. This is not just for the sake of knowledge but there might be a situation when plastic surgery is desperately required. Basically, plastic surgery has two branches namely cosmetic surgery and reconstructive plastic surgery. Cosmetic surgery is concerned with improving the visual appearance of people who might not be satisfied with any of their physical attributes or body features. On the other hand, reconstructive plastic surgery aims to optimize normal appearance or functioning of a body part or feature such as nose, lips and etc.

If any of the above-mentioned is your concern by any chance then Dubai Cosmetic Surgery Center is the right place for you. It was established in 2005 by Dr. Farhat Bokhari in U.A.E and was selected by MBC television channel to perform surgeries for their show named "Bisarrah Ahlaa Kateer" in 2007. Being one of the leading cosmetic surgery centers, Dubai Cosmetic Surgery is not only recognized in Dubai and Middle East but is also offering its excellent services in some major cities of Pakistan like Islamabad, Lahore and also in Multan. Let us look at some of the very basic services that are being offered here.

Transplant of Hair. Hair transplant is no more an alien concept for people with hair problems such as hair fall and baldness. However, it must be understood that transplant of hair is not only restricted to head hairs but may also be required in some other area like moustache, beard and eyebrows. At Dubai Cosmetic Surgery you can get hair transplant on any desired area under supervision of highly qualified surgeons.

There are two methods used here that include strip hair removal or Single Hair Follicle transplant also called FUE Hair Transplant. In a situation when transplant of hair is considered to be one of the expensive surgeries, there are some amazing discount offers for first five customers.

Acne and Acne Scar Treatment. Acne is reddish and usually irritating skin rash that is common in people of all age groups particularly teenagers and young adults. It normally affects the skin of the face, chest, and back and often neck and upper arms. There are some effective skin care products and medications available that can improve mild scarring, but most of the times the acne scars are treated with a combination of surgical procedures and skin resurfacing.

Dubai Cosmetic Surgery offers acne and acne scar treatment at amazing discount rates than ever before. Scarring from Acne. Sometimes people do recover from acne without any side effects but some people are left with unwanted scarring from acne.
