Hair Clinic-in-a-Box - Continuous Treatment is Key! by [Amanda Hudson](#)

Article published on December 2nd 2011 | [Alternative Medicine](#)

Forget about lifeless thinning hair and a bald spot on top. The new Leimo Hair-Clinic-in-a-Box offers a new system of treating hair loss in the most convenient way imaginable. With eight (8) sets of the Leimo Hair Treatment Pack and one (1) Personal Hair Laser Starter Kit, hair loss sufferers are assured of continuous treatment for a year through the Hair-Clinic-in-a-Box.

The full range of Leimo products are formulated with a new patented hair loss treatment technology that prevents further hair loss and restores hair. All of its products are safe, effective, and contained in the Hair-Clinic-in-a-Box with the sole purpose of eliminating the hassles of reordering Leimo products when they run out, making the new system a perfect alternative to expensive hair loss clinics.

Clean and Nourish the Scalp through the Hair Treatment Pack

The Leimo Hair Treatment Pack contains Leimo's five (5) organic-based wet products.

Step 1: Clean!

The Bio-Cleansing Shampoo cleanses the scalp through a rich blend of mistletoe and fennel extracts that help slow down hair loss by removing excess sebum which contributes to hair loss. The Thickening Conditioner adds body to the hair through a moisturizing and strengthening formulation. The Scalp & Body Scrub removes dirt, dead skin cells, and excess sebum to make the scalp clean and healthy.

Step 2: Nourish!

The Scalp Therapy Day Treatment blocks DHT formation, the major cause of hair loss, through saw palmetto extracts. Rich in an ultra-concentrated natural formula, the Scalp Serum Night Treatment stimulates the follicles and promotes hair growth by inhibiting DHT production as well.

Regrow Hair through the Personal Hair Laser

Enclosed in the Leimo Personal Hair Laser Starter Kit is a set of the five (5) Leimo wet products and the Leimo Personal Hair Laser. The Personal Hair Laser is a laser comb device that restores lost hair safely and effectively through the principle of photobiostimulation.
