Save \$200 on the Leimo Starter Kit Hair Treatment for Hair Loss by [Amanda Hudson](#)

Article published on February 1st 2012 | [Alternative Medicine](#)

How are you getting on with your hair loss treatment regimen? Are you still looking for several products in different places – causing wasted time, money, and effort? Well, it's time you refrain from doing this troublesome routine. Leimo, Australia's household name in hair loss management, presents a better option for all Australian residents suffering from hair loss.

Leimo lets you take home its COMPLETE hair restoration kit at a much LESSER price you can't resist. Give us a RING and instead of \$1,195, you can have the Personal Hair Laser Starter Kit for ONLY \$995.

The Leimo Personal Hair Laser Starter Kit is a safe and effective dual-purpose kit, targeting the main cause of hair loss which is dihydrotestosterone (DHT) while stimulating new hair growth. With this kit, you can achieve a complete hair restoration experience at home. This is how it will work for you.

1. Cleanse and Condition Your Hair and Scalp

With its rich blend of mistletoe and fennel extracts, the Bio Cleansing Shampoo takes away excess sebum and assists in the reduction of DHT levels.

Next, moisturise, thicken, and pump up your hair with the Thickening Conditioner which contains grape seed extracts and other natural essences that provide nutrients in maintaining healthy and thicker hair.

Exfoliate with the Scalp & Body Scrub thrice a week. It should keep the right amount of moisture in the scalp by removing pore-clogging grime and excess skin debris.

2. Nourish and Feed Your Scalp

Through the Scalp Therapy Day Treatment, you can stop further hair loss because it contains saw palmetto extracts that work deep into the roots to remove DHT. Using the Scalp Serum Night Treatment similarly, you are rejuvenating dormant hair follicles to stimulate hair growth.

3. Stimulate Hair Regrowth

The final step in your Leimo regimen is using the Leimo Personal Hair Laser, a laser comb device that restores hair through two forms of phototherapy: Low Level Laser Therapy (LLLT) and Light Emitting Diode Therapy (LEDT). Together, they stimulate hair growth through a chemical process called photobiostimulation wherein light turns into chemical energy to improve cellular productivity.

Added to the overall strength of the laser is the stimulating bar which is made of urethane rubber which massages the scalp and provides an acupuncture effect to improve the circulation to the scalp.

The Personal Hair Laser is clinically proven safe and effective for men and women with mild to moderate cases of androgenetic alopecia or male- and female-pattern baldness. With appropriate use, Leimo can provide visible results in as early as 12 weeks.

BUT WAIT!

You can continue the Leimo regimen all year round. By adding \$500 to the purchased price of the Leimo Personal Hair Starter Kit, you can have the Leimo Hair Clinic in a Box which is a one-year supply of Leimo's hair loss products in a bundle. From \$1, 995, you will only have to pay \$1, 495! You will not only achieve uninterrupted treatment all year round, you can also save yourself from the hassles of reordering another supply of hair loss products.

So call us at 1800-280-250 and experience real results through a real hair loss treatment that is LEIMO.
