Android App Development Creating Wonders for the Modern World by [Julia Roger](#)

Article published on June 8th 2012 | [Auctions](#)

Android is in the forefront of the cellular world and in the world of processor speed. Born to non-â€ renowned minds, and adopted by cellular giant Google, it has now come to be seen as the greatest miracle in the world of cell phones and smart phones. Android is perhaps most popular, after its lightning speed, for its app store. android app development has created a veritable diamond field for app seekers, for they can never reach the end of the store, such is its magnitude.

Applications or apps as they are called, are nothing but small software that have been designed to perform certain singular tasks that make our life simpler and truly speaking, more fun too. Android app development is so efficient as to create thousands and thousands of them. Here you will find apps that will teach you how to cook, and even apps that are games and at the same time apps that will help one in oneâ€™s daily business and job life. Thus, in short the app store is a complete lifestyle store. However, when it comes to apps, Android app development teams are not the only ones who have performed miracles in this area.

Call upon the giant of the mobile industry and that is Apple. Appleâ€™s iPhone is the most advanced smart phone in the market today. iPhone applications perhaps, have not created sheer quantity but what it has created is absolutely genius. Apple with its visionary leader, has always tended to create that which is absolutely novel, and has been successful in that venture repeatedly. iPhone app development has created soft wares and technologies that are completely revolutionary. Therefore, at the end of the day, it isnâ€™t a competition between who is better, but rather that both have created wonders for the modern world.
