Purchasing Affordable Used Trucks in Edmonton AB by [Ellsworth Mcilrot](#)

Article published on April 19th 2012 | [Auto](#)

A truck is a versatile vehicle that can transport big amounts of cargo. A model like the 2006 Chevrolet Silverado is a pickup truck that you may want to consider for its efficient performance and durability. Other pre-owned trucks available in Edmonton auto dealerships also have excellent features that make them good buys.

The Silverado offers a powerful drivetrain for drivers in Edmonton. It has roomy interiors and a strong 6.6L V8 engine that allows a convenient drive. Its compelling package is ideal for towing and hauling, and is designed as an affordable on-the-job companion. This 4x4 automatic transmission pickup truck won't fail on and off the road, and is in a close competition with similar trucks like those from Ford.

The purchase of used cars is protected by a 92-Point Inspection, Vehicle History Report, and Exchange Privilege. While all pre-owned vehicles are certified pre-owned and purchased directly from the manufacturer by an auto dealership, these vehicles still undergo a 92-point inspection from factory-trained technicians to ensure that they are in premium condition. Used car buyers are also given the information they need through a CarProof vehicle report that indicates all the maintenance works the vehicle has undergone. The report further provides Canada and U.S. registrations plus insurance coverage data.

A 30-Day exchange program is another service given to Edmonton used car buyers. In the event that the car demonstrates mechanical problems within 30 days of purchase, the owner can return the vehicle and choose another of the same or greater value. Used car buyers also have limited extended warranty coverage. This includes the engine, diesel engine, transmission and front or rear wheel drive functions.

The used trucks Edmonton auto dealers offer come from a huge inventory with a diverse line-up. Other makes include the Ford F-150 and Ford Ranger. For a more convenient search, buyers can access their auto dealer's website and use a CarFinder tool where they can indicate their requirements for a pre-owned truck. The local dealership searches it for the buyer and notifies him as soon as the vehicle that matches their requirements is found.

Both new and pre-owned vehicles Edmonton auto dealerships offer can be purchased through a finance plan that is suited to the customer's budget. This ensures the buyer that he can regularly pay for his purchase within the payment period. Other than financing, Edmonton customers can expect expert auto advice on their vehicle choices.

The vehicles Edmonton residents purchase are serviced by professional auto experts. They can schedule an appointment to have their vehicle checked, repaired and upgraded. To know more about pickup trucks, visit outdoorcanada.ca.
