The fastest cars are available at Prestige Car Hire by [Julia Bennet](#)

Article published on July 12th 2012 | [Auto](#)

Where do most car rental outlets run their business from? The airports, right? In the UK, especially around the southern bit, one car rental company has differentiated itself from the rest in terms of popularity and mass appeal and that is the Prestige car hire company. It does not take a genius to figure out why car rental companies choose to establish most of their desks next to airports. The sheer volume of travellers who flock to performance car hire outlets right after landing is a fair indication of what people want when they travel on the road.

How do you zero in on a good car rental company? Well, to start with, it should provide exactly what it advertises. Prestige car hire outlets claim that they can hook you up with the classiest of cars, as well the fastest sports cars. Thankfully, for us travellers, that is exactly what they provide us with. You can be a gentleman stepping out of a Rolls Royce or you could be a total player zooming past in a McLaren - all such needs will be taken care of by a performance car hire outlet like Prestige.

According to what they claim on the website, Prestige car hire is one of the best options if you were to land in some of the busiest southern UK airports like Heathrow, Gatwick, London City, etc. This is one of the best things they could have done because this offers people travelling through these airports the much needed option of choosing the kind of cars they want from rentals. Most of the car rental companies across the country have a pretty limited selection of cars. A performance car hire outlet like Prestige, breaks that norm.

The most important thing to a performance car hire company, or any other service providing for that matter, is the customer base. If a company is being looked upon as one which caters to only one kind of customers, it will not find popularity amongst the other groups. For example, car companies like BMW, Rolls Royce and Bentley only sell their cars to people of a certain spending capacity in which most of us do not find ourselves. But, through a rental company like Prestige car hire, we can fulfil our dreams of driving any of these cars on the road.

The thing about travelling is that it's not always planned ahead. Sometimes we take a trip after having decided on it at the eleventh hour. This makes it very difficult to get car rentals as most of them do not cater to same day travel requests. The good thing about Prestige car hire is that it also entertains people who call in at least eighteen hours before the scheduled travel. No wonder that among all the performance car hire companies, Prestige is one of the most popular ones. So, the next time you decide to take a road trip anywhere in the UK, you know who to call.
