The "Best Rated Baby Monitors" • Features Motorola Digital Video Baby Monitor by [Andy](#)

Article published on March 16th 2012 | [Babies](#)

Among the many great names in the manufacture of baby monitors Motorola come as one that is of good repute and one that is featured in the website Best Rated Baby Monitors with two of its digital video baby monitor. The website Best Rated Baby Monitors can be accessible for anyone interested to find the right and the best baby monitor for them to use, with baby monitors from well known names in baby care and parenting like Snuz, Angelcare, Philips, Summer and yes, Motorola. It can be accessed through its URL <http://www.bestratedbabymonitors.org/> 24/7 and parents will marvel at the many great features of baby monitors and Motorola's digital video baby monitors being among them.

Although baby monitors have been around for quite a time already technological advances related to its enhancement has never ceased through time where if before parents are content with mere motion and sound baby monitors, today having a digital video baby monitor appears to be the better choice. There are parents who after all believe in a more intricate kind of monitoring for their baby and to be with visibility all the time is the best kind of monitoring that these parents know of. This is how a digital video baby monitor can be the better or even the best choice for these parents and this site affords parents interested in getting no less than the best quality of digital video baby monitor with the means to finding it.

Motorola is one of the brand names of great repute within the realms of electronics and technology and for it to produce baby monitors with digital videos one can be sure that it is of accurate viewing capability. The Motorola Digital Video Baby Monitor with 2.8 Inch Color LCD Screen gives parents the chance to view their baby in their every movement with great accuracy that they can be with more peace of mind even when they are rooms apart with their baby. Sometimes it is not enough that you just see your baby but rather see your baby with clearer view that you can be sure their movement can be interpreted as it really is taking place.

If dark rooms are a problem for other video baby monitors however this is the only way to put your baby to sleep longer and better, Motorola makes it possible for you to still monitor your baby given such a scenario. Thanks to its infrared night vision you can still see baby movements with accuracy. Among other useful features include 5 polyphonic lullabies, additional camera capability, and an out of range warning reaching beyond a range of 200 meters.

A site such as the Best Rated Baby Monitors provide for a venue for baby monitors such as the digital video baby monitors from Motorola to be featured and its unbiased product review to reach the buying public. And with a direct link to Amazon, parents will find it easier and more convenient to find the right baby monitor with the site's very wide array of baby monitors.
