A variety of monitoring cameras installed the choice of location by [Guardlyer](#)

Article published on May 3rd 2012 | [Business](#)

The installation of surveillance ip camera is a very complex environment, how to install a suitable and easy to use surveillance cameras Contractors confused. Today, Shenzhen apexis Technology Co., Ltd. Engineering Department of Mr. Liu Shengwei give you the following list some of the most appropriate camera type applications, monitoring system design reference for engineers:

: Dome IP Camera is generally suitable for installed in the elevator, there is little change in the indoor ceiling light applications.

Second: the infrared ip camera is the most suitable for installation in a large dynamic range of indoor surveillance of occasions, also suitable for installation in

Outdoor IP Camera monitoring medium range of occasions (for monitoring the target within the outdoor 60m radius).

Third: The gun camera can be installed on any occasion, indoor and outdoor occasions, but not suitable for monitoring or install a smaller range.

Fourth: underwater cameras for underwater installation.

Fifth: the infrared camera for ambient light changes occasions, such as indoor and outdoor night lighting is weak, normal brightness occasions in the daytime.

Sixth: the Speed ??Dome Camera is suitable for installation in a more important place, at the same time the need to monitor the area is relatively large in the place.

Seventh: The long-range ip camera suitable for installation in monitoring the distance is quite far, such as highways, residential entrance and other locations.

Simple security monitoring camera is installed to provide the above points recommended reference for the security agents and Contractors.
