Article published on June 23rd 2012 | [Business](#)

Air Management Control Systems Ltd are an innovative engineering company based in Devon UK. With over 30 years experience in the design, sales, service and repair of all types on temperature control systems and air conditioning systems. We aim to have our customers understand how temperature control units are an essential part of cost effective living, reducing your heating bills as well as helping to reduce the carbon footprint. We supply heat pumps from the leading manufacturers designed to give you a healthy comfortable temperature all over your property.

We service both domestic and commercial sites and have an impressive client list including, offices, hotel groups, as well as leisure facilities. We assured that no matter how big or small the job is the work is always of the same extremely high standard. We are well known throughout the industry as leaders in the supply, installation and maintenance of temperature control and air conditioning systems.

We have a fantastic staff all of whom are highly trained professionals, we also provide continuous in house training so that we are confident they really understand the benefits of our systems and can advise accordingly. We are approved installers of Daikin, Toshiba and Vent Axia air conditioning systems and assuring you of our service we have achieved ISO9001 quality assurance.

From initial enquiry or idea our in house design team will work with you to make sure you achieve the best temperature control system for your premises. This service goes hand in hand with our technical department who use the latest software equipment to precisely measure the size of system needed which ensures optimum performance and the reduction of waste.
