Aircraft replica props for movies by [Tdakotaair](#)

Article published on June 20th 2012 | [Business](#)

All of us get excited on watching the larger than life Hollywood movies full of action sequences. Many of these films are based on wars and other subjects that use aircraft replica props to create real life scenarios even in the movies. These imitation props are so well designed that you can not even think that these are not real flying machines but are just their models.

Film makers have always used the skills of these artificial air craft makers in their movies by making some of the biggest hits ever in cinema history that have used aircrafts.

Starting from the movie Munich, directed by Steven Spielberg, one of the most renowned names in film making all over the world, the list is long. This movie utilized UH-1 "Huey" helicopter prop and it was so impressive that it got nominated for 5 academy awards that year. They even blew a chopper to make the movie realistic making a huge impact on audiences.

Batman fans can never forget OH-58 helicopter that was used in the chase scene in Dark Knight and was also blown apart in the end during the chase. The movie was acclaimed critically and earned huge profits.

Another big movie that used CH47 as a prop was The Day The Earth Stood Still. The interior of a chopper shown during the movie were actually components of a CH47 prop. This turned out to be one of the most popular movies for The 20th Century Fox.

The latest in the list is A-team, the latest action packed movie that was supplied with Huey helicopter and V22. The helicopter shots and the action scene in the movie were acclaimed highly by the viewers. And the movie turned out to be highly profitable.

Aircraft props used in the movie made it possible for these scenes in the movie to look real adding excitement to overall movie watching experience for the viewer.

Behind the success of all these movies was a common name that supplied aircraft props to all these projects. Do you want to know its name? It was Dakota Air Parts from Fargo North Dakota USA, a hugely acknowledged name amongst film makers for delivering amazing aircraft props. Being a world leader in helicopter spare part supplies since 1994, Dakota Air Parts is famous for not only supplying the equipments but also educating the customers in respect to aircraft logistics.
