Asbestos surveys and removal services in Nottingham and the East Midlands by [Cordtape](#)

Article published on July 6th 2012 | [Business](#)

We all know that asbestos can be a dangerous material, so it has to be removed carefully. Asbestos was widely used in construction between 1950-1980, so often carcinogenic asbestos can be found in insulation materials in buildings so it's important to have a regular asbestos survey to ensure the safety of all inhabitants/ employees. Cordtape offer asbestos removal in the East Midlands and Nottingham and can ensure that a property is safe. As asbestos can be a serious health hazard, without regular asbestos surveys and subsequent asbestos removal, a company could end up with an asbestos law suit. To avoid this, it's recommended to get in touch with a professional asbestos removal company such as Cordtape.

Ways to look for a company specialising in asbestos removal

You should choose a company that provides unrivalled services in asbestos management. When looking for an asbestos removal company you should choose one that is experienced as well as suitably qualified. You should also hire a company that provides a comprehensive range of services that comprises of pre and post demolition asbestos surveys, air sampling, testing and observation. When looking for such a company you should get in touch with Cordtape. Cordtape has 25 years of knowledge and experience in asbestos surveys and asbestos removal.

Why Choose Cordtape?

Cordtape strives hard to create flexible and innovative solutions and bring about positive changes to provide sustainable solutions.
