Car Parts are the Life and Blood of a Car by [Julia Roger](#)

Article published on June 7th 2012 | [Business](#)

You have spent good money on buying the latest car in town. However, it is equally important that you do not compromise on the Car parts. The parts of the car can be referred to as the life and blood of the car. A small spare part has the capability to bring your car to a grinding halt in the middle of a highway. Therefore, if you feel that any of your spare parts of the car be it brakes or batteries, is playing the truant you must immediately have it replaced. However, you must opt for quality materials.

Once you have a vehicle at your disposal you must have a proper idea about its Exhaust system. It is usually a piping, which is used to guide reaction exhaust gasses away from a controlled combustion inside an engine or a stove. It is a system, which conveys burnt gasses from an engine using these exhausts pipes. The pipe may be referred to a silencer in Europe or a muffler in North America. The design structure is important as it carries toxic gasses away fro the users of the machine. Most gasses, which are released from the machine is hot. Hence, it is important that these pipes are heat resistant.

Do you ride a motorcycle? If so you can see this system as a chrome plated display feature that is visible. The ones meant for motorcycle are varied. It depends a lot upon the design and its use. In trucks or lorries often the system is covered by a perforated metal sheath. It is done to avoid people from getting burnt. In a two stroke engine or a dirt bike this pipe is referred to as an expansion chamber. These pipes are important as they allow engine to remain cool and increases the longevity of the vehicle.
