Crystal Trophies Choose a Unique Piece by [Julia Roger](#)

Article published on March 29th 2012 | [Business](#)

Crystal trophies come in various shapes, sizes, and materials. You need not think more while purchasing any kind of crystal trophies. You can choose a simple plate with engravings or a customized art glass. You need to think for a while when you are selecting crystal trophies for your awardees or events. There are varied versions of trophies and you can take suggestions on how each of them can be appropriate for your awards. Crystal trophies are made of 24% lead crystal and valued highly because of their clarity and brilliance. Due to this reason, crystal trophies are considered as a brilliant choice and it would be immense to represent brilliance in any field.

The materials are manufactured to make about 3 inches thick layer and undergo a dreary mechanized procedure. This involves submission of heavy weight. Cheap trophies can be purchased in order to save some amount of money if you are placing bulk orders. The final product that is to be received should be clean without any bubbles or any other distortions. This serves good if you want a lead-free, tough optical crystal that would be among the best choice.

A Crystal trophy of this kind does not include any amount of lead but they have stiffness that makes it an ideal for making bevels. They are frequently used in industries as lenses, binoculars and other similar gadgets. If you want a more updated look of your crystal trophies, then you might check out the black optic crystals. It has the same flawless quality of regular optic crystal but they are mixed with the oxides of iron, carbon, manganese and cobalt oxide as well. These materials turn them into black colors. Some of the manufacturers integrate information in a black crystal award to make unique design that fits for the awardees. Art glass also belongs to the same category as that of crystal trophies.
