DA-1000 vocopro proves to be a value for money karaoke mixer by [Rob Kuron](#)

Article published on January 12th 2012 | [Business](#)

Passionate music lovers are always in a hunt for quality sounding devices such as music systems, sound boxes and karaoke mixers. While music systems, speakers are costly possessions and are not bought frequently by the users a good quality karaoke mixer for these devices is always a commonly used pocket friendly accessory. These devices amplify the performances of your music devices and you get optimum output from them. A quality karaoke mixer when gets integrated into a music system, both the music and the vocal signals can be customized for optimal quality irrespective of the performance of the source device, amplifier and the speaker.

If you are a music buff and more inclined to go for a higher end model karaoke mixer that works fairly more than an amplifier, DA-1000 Vocopro might be your choice. The compact and capable system comes with variety of different features which make it ideal for day to day home use and larger venues as well. The digital echo with separate repeat and delay controls are DA-1000's most powerful functions which allow you to reach near professional standard vocal and music effects. The new Vocopro digital karaoke mixer comes with treble and bass controls which can be used to adjust the frequency levels of both the music being played and the vocals from the microphone. The mixing of input from microphone and the player is better than the previous pro mixers from the manufacturer. This really allows you to tweak your performance to perfection and attain that quality that karaoke buffs always aspire for. The DA-1000 Pro has 3 additional microphone inputs, 2 extra A/V inputs and 3 extra video outputs which comes handy if you have many inputs or outputs need at the same time. This mixer plays both CD+G and DVD files types, hence you can play the top professional standard recordings on the DA-1000.

The vocal cancel and vocal partner features of the karaoke mixer can remove or add vocals on multiplex karaoke tapes and CDs as required by the user and produce decent result with the function unlike other ordinary mixers. It actually delivers on the big claims it proclaims to deliver which some might suspect for the small price tag attached to the device. This is not the only decent performing karaoke mixer in the market. There are several more expensive models out there which perform much better such as Yamaha Mixers that are far more powerful and deliver a better sound quality. It will be very hard to find a better performing system for the same price. It is definitely worth the money one puts in.
