Dangerous Goods need to be handled with the greatest of care when being transported. by [Mary Porter](#)

Article published on June 19th 2012 | [Business](#)

Why is it necessary to use specialist companies when transporting dangerous goods?

There are all sorts of dangerous goods that are being transported across the UK and beyond every day. It is of the utmost importance that those who are handling the products know exactly how to transport them with the utmost of care. There are specialist companies that are trained in the movement of these items who know how to move them about without unnecessarily endangering the wider public at large. There might be corrosive liquids such as acids or things which are potentially explosive. It is obvious that these types of products need to be handled with extreme caution.

What sorts of dangerous goods might be transported?

Some of the hazardous transport that might be transported include explosives, gases, flammable liquids, flammable and reactive solids, oxidising agents & organic peroxides, toxic and infectious substances, radioactive items and corrosives. Knowing how to handle each and every one of these items is very important. Any company who does undertake such transport jobs should have a Dangerous Goods Safety Advisor as part of their team. These people are trained to the highest standards in how to deal with such potentially disastrous products.

Where can you find a good company that knows how to transport dangerous goods?

Although there are many transport companies within the UK, the ones that know how to properly handle Dangerous goods are few and far between. It is always a good idea when approaching potential companies to transport your dangerous goods, to make sure that they have well trained staff with all of the correct credentials. One company that does specialise in the delivery of such items is called ADR Express. They have been in the business of Dangerous Goods transport for quite some time now. They have an excellent website at www.adrexpress.co.uk, where you can find out all about them. They will be able to advise you of the best logistic solutions for whatever dangerous goods that you need transporting.
