Natural stones makes a perfect choice for decorative purposes in construction and monumental sculpture. Generally, Natural stones are preferred for decorating personal garland and making pathway either in between lawn or in along with lawn. Small stones, mainly pebbles, enhance the beauty of lake either laid in between the lake or pond or placed at the circumference of it. Few natural stones such as Marble, sandstone, limestone, granite, when used for decoration purpose, give a natural touch to our home or garland.

Buildings and houses constructed using stone usually have the environment friendly structures. Stones are available with wide range of texture options that display an aesthetic sense of its owner and considered as a most durable form of construction and a perfect decorative material. Unlike metal and glass decorative, Stones doesn't wear out easily and hence enhances the beauty of areas like bathrooms, spa areas, gardens and parks, where environment is not friendly for metal and glass decorative. Stones when used in exterior of a building, which make the building stronger and resistance to fire and reduce maintenance.

History also provides references on making houses using stones. Although stones are only construction material available at that time besides mud and trees. Various civilizations preferred stones, as houses constructed with the help of stones are capable enough to resist fire, wind, water as well as various insects including termites. In modern times, eco-friendly stones houses have gained immense popularity because of their magnificent properties. It is suggested to use durable stones like as granite marble and sandstone over limestone to avail maximum benefit out of them.

To discover the maximum beauty form natural stone, it is necessary to select the right stone after understanding the qualities of each type of stones and surrounding environment. Personal preference like choice and combination of stones or even a customized idea also helps in enhancing the beauty. Some concern must be given on budgets and availability of particular stone. However, choice can be made from the following listed stones:

Granite - Granite is probably the most popular of decorative stone. It is most durable and have the bold colors with textural pattern. Granite is economic in term of affordability and durability.

Marble - Marble is one of the most beautiful natural stone. The varieties of marble range from pure white color to black, having pink , yellow, blue, purple, red, brown etc in between. Marble is more expensive than granite but not so durable than granite.

Slate - Slate is also a good choice, it is durable and extremely versatile. Slate is available in almost all colors and different textures which make a decent choice for accent installation. Slate will does a good combination in kitchen with a granite counter top.

Sandstone - Another good stone, sandstone's softer texture and beautiful appearance makes it a reasonable and popular choice. Sandstones are affordable but not so durable.

Travertine - It is a part of lime stone family, this stone is durable but also more susceptible to staining than granite or marble.

Limestone - Limestone was very popular in middle age. But scriptures and monuments made of limestone suffered severe damage due to acid rain. Moreover, limestone are generally hard and durable.
