Gift-giving almost always requires a lot of thinking. Among the things you need to consider when selecting appropriate gifts include budget, a person's interests and hobbies, and of course, the occasion when the gift will be given. A personalised gift such as one you made yourself – cookies, DIY crafts, a card, etc – is guaranteed to be appreciated by the recipient because of the time and effort you put into coming up with and executing your gift idea. Unfortunately, as much as we want to, we could not always afford the time to make your own gift. But a relatively new trend can make gift-giving a breeze: DNA modern wall art.

In a nutshell, DNA portraits are made by taking a sample of a person's DNA, getting a digital image of the bands and sequences that complete a person's DNA makeup, enhancing and customising said image, and turning it into a modern piece of artwork using museum-grade canvas/photo paper and advanced printing equipment. As each person's DNA is unique, so is his DNA artwork piece. Being able to translate the characteristic that makes you unique into something tangible and artistic is awe-inspiring in itself. What more if you are lucky enough to be gifted with such a wonderful personalised gift?

DNA Art is so far the only company in Australia that offers this kind of service. We get orders for our DNA Art Gift Boxes all year round. Our DNA artworks have proven hits on various occasions, especially birthdays. Do you know of someone who seems to already have everything? Give them a portrait of their DNA and you can be sure that they will treasure your gift. One good thing about our DNA portraits is that they are printed using high-quality inks on independently tested canvas, which means the quality is going to last for many years.

What is a better way to commemorate one's birthday than by celebrating a person's uniqueness? personalised DNA artwork gift tells friends and loved ones how special they are to you. DNA Art even allows you to select a colour combination that best represents an individual's personality. We have over 50 styles available if you would rather choose from available options. We also have seven different framing types so it should not be difficult to decide an appropriate way to present your gift to the recipient.

Our DNA portraits are great for weddings and anniversaries, too. As we can fit up to four DNA profiles in one frame, customers can have the DNA profiles of two persons combined to symbolise unity and celebrate togetherness. Our DNA artworks make excellent gifts for housewarming and corporate occasions. You can even have DNA portraits of your loyal pets. Whatever the occasion, people are sure to love their DNA portraits and find it easy to find a place for displaying them. DNA artworks possess a contemporary look that complements any decor and interior design.

DNA Art gives you the opportunity to mark special occasions and celebrate family and friendship in a unique and inspiring way. With DNA portraits, you can give the important people in your life a one-of-a-kind artwork that they can enjoy in the years to come. Ordering is simple on our company website. Simply indicate your specific instructions and wait for the DNA collection kit, which we are going to send you. If you are ordering for a print to be sent as a gift, we will send the kit to your recipient with paid-postage envelopes for mailing the samples back to us. Allow us to do the rest and wait for your DNA portraits to arrive within four weeks' time.
