Foreclosure Clean Up Services a Top Business Opportunity for 2011 and Beyond by [Foreclosurecash](#)

Article published on December 16th 2011 | [Business](#)

If you look at a list of the best small businesses to start, you'll notice that many cleaning services are at the top. This is no coincidence, and has been this way for the last few years. With the rates of home foreclosures increasing steadily even into 2012, you can expect foreclosure clean up businesses to rake in large amounts of money as a result. Now is the time to begin researching, and creating your very own clean up business.

Foreclosure cleaning is a specific niche within the cleaning industry as a whole. This segment of the industry is experiencing enormous growth, and doesn't appear to be slowing down at all. The opportunities are vast when it comes to finding work in this area. Anyone can start their own cleaning business with a little bit of effort and time. It requires surprisingly little capital to start, and is a great way for many people to make money in the current economic times.

Commercial cleaning is one of the fastest growing business opportunities available right now. Names like Jan-Pro, and Stratus Building Solutions are ranked at the top of the charts when it comes to the fastest growing franchises being started across the country. These cleaning firms cover everything from residential to business buildings. By not only relying on the foreclosure aspect, you allow your business to thrive in any economic environment.

Real estate is always going to be bought and sold, and because of this fact, cleaning these vacant homes in between will always exist for businesses to take advantage of. It just so happens that the housing crisis is creating a golden opportunity for many out there to seize. While the banks take over homes being foreclosed on, they in return need to hire a cleaning business, like yourself, to clean up the home so that it can be placed back on the market. A market that will always be around no matter what happens in the future.

Shadow inventory is a term that is becoming well known in the foreclosure cleaning business. Let me explain. Starting a business cleaning foreclosed properties will continue to remain a great business idea because of the way banks sell homes that have been foreclosed on. Shadow inventory are properties that have been foreclosed on, and are not listed for sale yet. The banks will hold onto these homes until the market presents the right conditions. While the properties sit vacant, the banks need companies to go in and clean and maintain the house. This is where the foreclosure clean up business comes into play. Most banks are literally sitting on over a years worth of shadow inventory, and that number increases everyday.

As you can see, the need for cleaning foreclosed homes is in constant supply. With the number of homes being foreclosed on still rising, now is the perfect time to start your own cleaning business. Whether you franchise, or create your own, you can expect plenty of work to come headed your way. With a little bit of dedication you can start the business you've always dreamed of owning starting today.
