Our smoking pipes are handmade and very artistically designed. The size of a pipe depends largely on what is intended to be smoked in it. Large tobacco pipes are used for strong-tasting, harsh tobaccos, the smoke from which is usually not inhaled. Small pipes are used to smoke tobacco. To smoke a smoking pipe one has to put his smoking stuff in the small bowl and light it. Then the next step is taking a puff and slowly exhaling the smoke out. A smoking glass water pipe is itself a wonderful experience.

Color Glass Smoking Bubbler

Glass smoking Bubbler is also a kind of filtration device it is used for smoking herbs. Our smoking Bubblers are made by skilled craft men. They also have the property of color changing. Glass Bubblers are fumed with gold and silver. Bubbler smoking is similar to smoking a bong. To use it one has to fill the bowl of bubbler with herb and water and then light the herb in the bowl. Taking Puff is as simple as smoking. Normally people use it for relaxing themselves. The best property of a bubbler is that it filters the smoke and also cools it, so smoking a bubbler is less harmful. It is excellent for smooth smoking pipe.

Grinder

Herb grinders are the most useful accessories for all smokers Herb Grinders are used to grind and make smoking herb fine. It is better to grind the herb before smoking a pipe because it helps the herb to burn more nicely. Nowadays Grinders come with filter system after grinding herbs become more fine and smells good. In this process herb grinders have indeed progressed technically over the last few years. The wood or metal or plastic multi-stage compartments are in theory supposed to evenly cut the softer portion of the plant while permitting the easy separation of stems and the occasional unwanted seed.

A few herbal units for grinding even contain a separate section for the retention of the ground plant material. Frankly the evacuation of herb material on any nearby surface seems a whole lot more logical for the user, but there are options in the herb grinder arena. Depending on the screen style an extremely fine mesh cut can be achieved and users find use for this kind of material which is great. Herb grinders are very simple to use and easy to clean. It is very simple to use you just have to Pull apart the 2 pieces and put your favorite stuff in it, put the top Apply pressure and twist the cap and stop when desired consistency is reached.

Dougout

A dugout system is similar to One Hitter system, is a very small portable smoking instrument. This is portable so it is very easy to carry anywhere. This Dugout Pipe is extremely useful, providing discretion and great functionality. It has two holes in one hole you can put your herbs and the other one is for a small pipe, which you will use for your smoking. The short pipe is spring-loaded, so it will pop out as soon as the covering has been pushed aside. We have a good selection of wooden Dougouts. We use world's finest wood to make our dugout smoking system.

Vaporizer

A Vaporizer is a device, used for extracting and blending smoking stuff. It burns the herbs to that extent that the production of irritating toxic products of the material boils off into a vapor. Vapor

ideally contains virtually zero particulate matter or tar and significantly lower concentrations of noxious gases such as carbon monoxide. The extracted vapor may be collected in a jar or inflatable bag, or inhaled directly through a hose or pipe. With little to no smoke produced and cooler temperatures, less material is required to achieve a given level of effect. Hence, the irritating and harmful effects of smoking are reduced. Vaporizers are made of glass and metal.
