How to choose the best lighting manufacturers by [Paul Pepe](#)

Article published on August 13th 2012 | [Business](#)

The energy efficiency lighting is important for commercial and industrial applications since it gives consistent light. MHT Lighting manufacturer offers the best designers that offer the best designs and beautiful fixtures for the application. You will always get what you want regardless if you need elegant lighting, special lamps or outdoor lights. However, you have to be careful when choosing the right lighting manufacturer, regardless if you want to use the lights yourself or if you want to buy from a Lighting distributor. You have to begin by learning the type of the lighting that they can make. They include the induction lights for outdoor perimeter lighting and warehouses and the LEDS for interior lighting.

You have also to go for the manufacturers that can offer you the highest quality products and this can be noticed if they have an ISO 9001 approval. This means that they will burn and test every light for over 3 hours to check for any early detectable problems. You have also to know how long of a lead time it may take them to deliver their products as well as how much it will cost you. Besides of being able to cater for your needs, you have also to make sure that they can offer the lights of the best quality. However, if you have different needs, you can also go for the manufacturers who specialize for a certain type of lights. Even if this can be proven to be expensive, it will ensure that you get only the best quality for your lights. Before you go for a certain manufacturers, you have to learn about its background both online and offline. In this way, you can know if they are able to deliver what they promise and if their customers are satisfied. You can also take time to learn if the manufacturers are using the latest technology in lighting. This will ensure that you are getting only the best for application.

If you want to become a lighting distributor, you have to know how to begin. You have to begin by selecting a certain lighting products that you think can get many customers where you want to open the business. You have to learn about the information that is requested by the lighting manufacturers before you can qualify to distribute their products. You have also to choose how you will be distributing the lights if it is on a physical location or online store. For anything that you do not understand, you have to call the company representative so that he can give you additional information. If you want to distribute online, you will need to get a webpage layouts as well as the fixture photographs to display on your website and permission from the manufacturer. Most manufacturers do not sell online and should not. Lights are sold to distributors through lighting reps and to ESCOâ€™s.
