Jeannine Du Chateau Was Responsible for Implementation and Auditing of JSEA and PHA Programs by [James Smith](#)

Article published on February 15th 2012 | [Business](#)

A B.S in Chemical Engineering from Michigan Technological University in Houston, Jeannine Du Chateau is a successful technical professional. She is presently pursuing her Masters of Business Administration (M.B.A.) in Corporate Finance from Capella University, Minneapolis. She is currently working as a Senior Technical Manager at DNV-Det Norske Veritas in Houston, TX. The company is known to earn an average revenue of \$9.5 Million NOK and serves as a global provider of services for managing risk and multiple certifications. At the firm, she is responsible for technical decisions related to Quality, Environmental, Health and Safety projects and training. She started her career as a Senior Environmental & Safety Engineer with Rockwell Automation in 1994.

Based in Mequon, Rockwell Automation is a reputed manufacturer of electronic components and systems, generating 4.3 billion dollars in annual sales. At the firm, Jeannine Du Chateau was responsible for managing 44 sites, with direct management responsibility of one facility for the EHC compliance, training and ISO 14001 certification. She was also an Internal Corporate Environmental Compliance auditor and travelled to approximately 14 Rockwell Facilities every year, helping with the compliance activities for plants inside and outside the United States. Later, in 1999, she joined Det Norske Veritas (DNV), Houston, TX as Senior Lead Auditor, and performed 100 EMS/QMS/OHSAS audits annually in different industries in different states and outside the U.S. Some of clients included Will Rogers Airport, General Dynamics, BP, NASA, Eaton, GM and Toyota.

From 2005 to 2007, Jeannine Du Chateau served in the Local Emergency Planning Commission at General Dynamics. General Dynamics is the fifth largest defense contractor in the world that manages all Environmental, Health, Safety and Security (EHSS) regulations, permitting, etc. It generated \$29.3 billion in revenue for FY 2008, and also deals in waste/wastewater management and waste reduction activities for an electronics and printed circuit board production facility. In 2007, Jeannine joined CDM-Camp, Dresser & McKee in Tampa, FL, as a Program/Project Manager. She thereby managed the scope, schedule and budget for engineering projects in the millions of dollars. Apart from this, she was also responsible for managing the engineering team activities which included (but were not limited to), performing feasibility studies, providing technical expertise and environmental compliance assessments for projects both in the public and private sectors.

Owing to her vast industry experience, Jeannine Du Chateau has developed strong problem solving skills which have helped her to identify practical situations and implement most appropriate solutions to achieve cost savings and OEHS process improvements. She is an outstanding team leader who is skilled at building relationships and managing multi-faceted activities necessary for the implementation of a company's objectives. She has received numerous awards in recognition of her exceptional services. These include Governor's Hazardous Waste Reduction Award, Crystal Award for Environmental Excellence and Values in Action Award.
