Make the best use of Platform scales which are both accurate and reliable by [Saima Triphor](#)

Article published on March 2nd 2012 | [Business](#)

Platform scales are found in almost all the industrial and even in commercial areas. They could range from 1000 pounds that are designed for the environment to handle heavy duties to simple and sober areas. They are capable of giving good quality floor scaling. For instance, here is a brief description of one of the digital scale with stainless platform. They have a programmable power which can be set to digital scale ratings and turned off automatically after not using it for few minutes. We can even program it to stay alive until it is manually set to turn off. We can also select the power allowance that would suit the best in our weighing application. These scales would have a remote display that is with LCD built in brackets that can be adjustable. This particular option will allow us to add or even adjust the mounting pole i.e. the backlit viewing LCD contrast for viewing the display easily and even quickly.

There is also a ZIEIS protector which is actually surge electrical protecting equipment. This can save us from furious electrical issue like spikes and disaster surges. This also comes with a lifetime warranty when it is connected with the digital scale of ZIEIS. They stand for LCD is also adjustable. This is to view the LCD display virtually through different angles. all these are few of the features of one kind of digital scale, however can have another example and compare them with this measurement machine. The one we are discussing now is a digital scale with draft shield which has weighing unit ranging from grams, to pounds with the capacity of 500 grams to 17.6 pounds. The accuracy would range from 0.01 gram to 0.0005 pounds; such is the accuracy of digital scales.

There are few high quality platform scales that has breeze shield. There are the custom doors that slide to save upon the air movement, ensuring the accuracy in results. All are up to international standards and are certified under ISO 9001:2000 and are managed under good quality. You can opt for shutting off the battery to automatic mode and save the battery life for longer.
