There are many people in Bahrain who use professional storage units, either for self storage or for commercial storage purposes. Few however fail to understand the importance of self planning before they begin using their acquired storage space. One has to predict their usage patterns in advance, before they move in things. This is to ensure that they can maximize their space utilization and prevent themselves from falling prey to common storage pitfalls that stem from haphazard storage utilization. Here are a few tips to help you plan in advance, organize things in a better manner, to improve your efficiency in accessing the things that you need, when you need them.

Sorting: When renting a storage space, one may use it to store multiple categories of things. This makes it important to sort through the stuff in advance and group them together. Common methods of grouping either follow the logical categorization route or the thematic categorization route. Which of the two methods one should choose, usually depends upon the goods being stored and personal preferences.

Furniture vs. Boxes: There are many who prefer putting their stuff in cardboard boxes, when renting a storage space. However, this not only looks a little ungainly, it also makes it difficult to identify different items without coming into close range of the cardboard box in question. Surplus furniture that may be lying around the house makes for a great alternative in such situations. A chest of drawers, for example, would be ideal to store documents in them due to the in-built sorting capabilities.

Prioritizing: It is imperative that one places lays out their storage space according to the order of importance. This helps in keeping frequent access items within reachable distance, while the lesser needed items can be pushed to the remote corners of the storage unit.

Going vertical: The units rented out by commercial storage facilities tend to calculate space usage on a cubic feet basis. Smart storage customers, not only utilize the horizontal dimensions of their units, they also maximize the vertical space utilization. An aisle based approach is a top tip from many a storage veteran for newbies.

Layout Plan: When renting anything larger than a small size storage unit, it is usually a good idea to mark the location of each individual item stored. This comes in handy, when accessing the unit over time. It also makes it easier to keep track of ones goods and protect them from pilferage.
