Number one selling Yasaka Mark V rubber sheet for 2011 by [Table Tennis](#)

Article published on January 24th 2012 | [Business](#)

A top quality tournament racket, Mark V rubber on a Swedish competition blade. A renowned classic in the table tennis world! The best pre-assembled racket we can offer. It comes with well known Mark V 2.0 mm rubber, one side red and one side black. A strong weapon in world class play.

Mark V is still the number one selling rubber sheet for 2011. It outsold all the rubber sheets we have in our inventory! Yasaka Mark V Rubber was one of the first rubbers blending natural and synthetic rubbers. It is more than 2 decades that this rubber has been a strong weapon in world class championship play with its dynamic speed and spin.

Speed: 90 Spin: 90 Control: 78

Through the years a large number of championships have been won with MARK V. The rubber has continually been developed as the demands of the top players have increased. Another new addition is the Yasaka Rakza 7 and Rakza 7 Soft line which has great reviews from table tennis players all over the US.

YASAKA is using mainly natural rubber gum for the top sheet. This improves the level of grip and the power of spin drastically. The top sheet is combined with the new Power Sponge. The top sheet and Power Sponge work in perfect synergy, producing the Hybrid Energy rubber RAKZA 7.

In RAKZA 7 Soft the top sheet is the same as for RAKZA 7. The sponge is softer which gives the rubber more sound and built-in speed glue effect.

With RAKZA 7 Soft the control characteristics are improved. After hitting the ball with top spin the curve of the ball is slightly higher, giving little bit bigger margins in the game. In the short return play, the ball feel is better.

Speed: 94 Control: 67 Spin: 95 Hardness: 45-50

YASAKA, using mainly natural rubber gum for the top sheet. This improves the level of grip and the power of spin drastically. The top sheet is combined with the new Power Sponge. The top sheet and Power Sponge work in perfect synergy, producing the Hybrid Energy rubber RAKZA 7. When the player hits the ball hard, the rubber grips the ball and the stroke can be used to place the ball accurately, both in direction and length. The serve and short returns are very sharp and easy to handle. Due to the increased percentage of natural gum the durability is improved. A winning combination!
