Printer is an essential computer output device that receives text and graphic output from a computer and displays the information on a paper. Many a times, printers are bought separately but often they come along when you buy a computer. Printers come in a range of sizes/features and the worth of the printer depends on these determinants. As a rule, the higher the colour resolution printing it offers, the more costly it becomes.

There are distinct kinds and brands of printer one can see in marketplace, laser printer, line printer, inkjet, thermal printer, and LCD & LED to name a few. Before buying a printer, one must think of the notable point that affects the decision making such as the use of printer. Whether you're buying for home use or office use? Inkjet printers are supposed to be the best option, if you are in look out for home use purpose. Inkjet printer give out good quality print, it is not complicated to use, at the same time, and they are very cheap. Inkjet printers are reliable to obtain result oriented graphics prints.

While opting for a printer, one must consider a number of different factors, like where and how frequently it is going to be used. If a printer is being brought for office use, then you might want to opt for a printer that has the provision to handle a large volume of pages that could definitely need to be printed every day. If you seldom need to print paper, you may choose for a cheap printer like inkjet type printer. You will also have to bring into account your needs as to what all features you expect in your printer or if you would like your printer to be a standalone unit. If you have a fixed amount of space available, you might want to consider a printer that is attached with a scanner or other features while selecting a printer.

An integral part of ink jet printer is called as ink cartridge. Ink cartridge is a removable part that holds the ink which is stored onto paper throughout printing.

If your need is to print colour images on a timely basis, then it is suggested to go for an inkjet printer. Inkjet printers are also taken into account as best choice if you are into creating photographs on glossy paper stock. In terms of cost, colour laser printers are comparatively more costly than inkjets printers.

Ink cartridges can also be reused instead of getting replenished with a new one, by doing this, consumers increase the life of their ink cartridges and saves some money at the same time. To refill a cartridge, users have to buy ink as well as other refilling products. It's also feasible to refill the same cartridges several times, but a lot of printer owners find out the process of refilling cartridges cumbersome and unwieldy. If your printer is running out of ink, you can again install a cartridge, shake it well and put it back into the printer. This process can help increase the life of your cartridge and postpone the need to replace your cartridge in the printer.

Maintenance is a priority for your printer, if you do proper care of your printer. The life of printer will grow and it will work effectively. Always shutdown your printer if you are not utilising it. Abstain from using dirty or dusty papers for printing. Always prevent having direct contact with the electrical parts of the cartridges such as chips. When you fill the cartridges, do not fill completely, it may drive leaks in cartridges and can split on the motherboard of the printer. Abstain from using your printer without cartridge for a long time, this could be a reason for the print head to dry.
