Article published on May 10th 2012 | [Business](#)

The Indian rubber industry is one of the fastest developing industries with scores of brilliant opportunities ahead. Among the several factors which have catered to the success of rubber industry of India the efficiency of Indian reclaim rubber manufacturers have indeed played a significant role. There are numerous rubber-producing units and reclamation plants being operated in different parts of the country by these manufacturers. Their role in transforming the country into a leading exporter of reclaim rubber and rubber products worldwide is indispensable. They very well serve ever-increasing needs of the domestic market as well as meet the diverse requirements of the international market with utmost satisfaction. Some of the countries to which the Indian reclaim rubber manufacturers export this chief ingredient include United States of America, Italy, Germany, Africa, United Kingdom, France, Saudi Arabia, Pakistan, Afghanistan, Bangladesh and many others.

Various companies purchase reclaim rubber from the Indian recycled rubber manufacturers to produce rubber products such as auto tyres, batteries, cable, tubes, automobile parts, mats, hoses, wires, footwear, belting, latex products etc. There are a number of factors which have enabled the Indian manufactures to transform the face of the rubber industry. Some of these factors include plentiful availability of all the raw materials needed to manufacture reclaim rubber, a large plantation sector, increasing domestic market, present economic reforms, cheap labor, excellent training and education offered by several technical institutes and many more. The best part is that the availability of all such factors is not expected to have any dearth in the coming future as well.

Besides, the very fact that today majority of the Indian reclaim rubber manufactures make use of the advanced tools and equipments enable them to manufacture rubber that match up to the international standards. Presently, the reclamation plants that are being run within the country by several proficient reclaimed rubber manufacturers are mostly outfitted with highly developed latest machinery which makes the entire manufacturing process extremely quick, refined and sophisticated. Thus, the foreign companies do not forego to grab the opportunity to purchase international quality rubber from the Indian market and that too at cheap rates.

As the flourishing rubber industry of the country is considered as one of the major sectors that play a vital role in the nation's economy, more efforts are being put in to promote it further. For this, the government is showing great interest in setting up more institutions providing training to those who wish to build a career in this industry. This way, after learning the skills, technique and knowledge about rubber manufacturing, talented individuals who are capable enough earn a good name in the rubber industry by becoming one of the best reclaim rubber manufactures in the country. The number of such institutes has significantly increased in the recent couple of years. Thus, it would not be wrong to say that the future aspects of Indian rubber industry are quite bright with lots of opportunities to avail.
