Southern Valve's ball valves are of superlative calibre and affordability. [James Blee](#)

Article published on June 16th 2012 | [Business](#)

As an independent and family-run business Southern Valve has maintained that close and personal service which ensures that our customer-focus is placed at the forefront of our business philosophy. The ball valves and indeed all manner of pneumatic valves, equipment and accessories service, is small enough to care and yet large enough to provide that all-important professional service that is backed by all the leading manufacturers in the industry.

Whether you're looking for a bespoke ball valves product, or indeed a standard option, then the selection of ball valves that we can offer are sure to cater for your individual requirements. These manually operated threaded and flanged ball valves are stocked in brass, stainless steel, cast iron and carbon steel and offer superior performance and longevity. The brass ball valves that we offer include the T handle ball valve and three way ball valves, each of which is sure to cater to your needs. With a wealth of sizes and specifications to choose from, and affordable prices that start at just thirty pounds and twenty six pence for the SV128-14L these ball valves are sure to cater to your requirements adequately.

In addition to the exceptional products that we can supply, here at Southern Valve also provide a selection of services that ensure customer retention. The technical support that we offer means our internal and external sales team can advise you on a number of different issues. With over forty years of experience we're perfectly capable of resolving any issues, and advising you on which is the right course of action.

If you'd like to find out any more information about the ball valves, or wealth of products and services that we offer, or indeed if you'd like to contact us and place an order then simply come and visit us online at: www.southernvalve.co.uk.
