Article published on January 2nd 2012 | [Business](#)

We are one of the leading Water Treatment companies in chennai, Our services are water purifier in chennai, water filter in chennai, water purifier dealers chennai, ro plants chennai, industrial ro plants, osmosis

In just 5 years we have grown big, really big in Water Industry. Its stunning and amazing is what our competitors talk about us. We have maneuvered water from nano purification to flash evaporation. Venus createch solutions Pvt. Ltd., comprises of a dedicated team of Engineers, Technicians & Administrators who are trained in their respective fields to provide Superior Quality Products & Unmatched Customer Service. We are the only company to bring the flash evaporation technology to India. More than 10 million litres of water purified in span of two years, touching more than 8000 people lives every day and making them the feel of true power of water. We are proud to say that we are one among south India's leading manufacturers and exporters of fogging / misting Systems and services & Water Purification plants.

The goal in water treatment is to eliminate disease-causing bacteria and to protect the environment for human life. Before modern methods of water treatment were introduced, the spread of life-threatening diseases was common in most communities across the country. Venus Createch Solutions operates to provide practical solutions to the growing global water contamination. The World Water Commission recently released startling facts in its recent 33 page report to further concern about the world's growing water shortage. The report states that an estimated 1.1 billion people lack access to safe drinking water, three billion don't have the means to access sanitized water, and another 500 million live in countries with barely enough water for their people. Furthermore the recent report indicates that world water consumption will increase by 40% over the course of the next twenty years as demand for personal, industrial and agricultural uses increase worldwide. When linked together the figures surrounding this crisis are staggering.

Venus Createch Solutions satisfy a significant demand for clean water suitable for human consumption, agricultural, industrial, domestic and recreational uses. With the technology in place Venus Createch solutions has positioned itself to substantially benefit from the growing world water market. Globally the water market is an estimated \$400 billion dollars with indications that it will continue to grow in the long term. The industry supported by this water crisis is expected to grow exponentially in countries such as China and India specifically, because of their naturally high population, and higher than average pollution.

Venus Createch Solutions continues to grow its operations. The company has continued research in water technology to demonstrate improvements in cost of manufacturing, economy of operation, space-efficiency and simplicity. The company continues to strive in advancing its product development in an effort to improve the efficiency of its operations and its ability to deliver a strong product to the global market. With world wide awareness of the global water shortage growing exponentially it will be interesting to see the impact that Venus Createch solutions can make in its industry and the world.
