What Do You Get with Your New Dreambox 8000 System That Makes It So Robust?
by [Hobbes Thomas](#)

Article published on June 9th 2012 | [Business](#)

A lot of people are looking for the Dreambox 8000 but do not want to pay too much for it and not entirely sure what is included with the system. If you are looking for a Dreambox 8000, the following fact sheet should help you make your best buying decision.

Dreambox 8000 HD Specifications:

The Dreambox 8000 is a digital satellite receiver. It comes with a 400 MHz MIPS Processor and Linux Operating System. It has an OLED Display and sports a a MPEG-2 / H. 264 Hardware decoding system. The tuner is DVB-S, with optional: DVB-C, DVB-T. It also has Plug & Play capability.

The system also has 1 x Smartcard-Reader with a V. 24/RS232 Interface and 10/100Mbit Ethernet Interface. There is also 1 x Scart (RGB, FBAS or S-Video) and DVI. The system offers 2 x USB 2.0 and an analog modem with S/PDIF Interface for digital bit stream out (AC-3). Users will love the 64 MByte Flash, 256 MByte RAM and SATA, for use either as internal SATA HDD 2, 5 or to use for extern eSATA. It also supports unlimited channel lists for TV or Radio and has a channel-change time of less than 1 second which is much faster than some other brands.

For ease of use, it has an automatic service scan and directly bouquet-lists as well as EPG (electronic program guide) and multiple LNB-Switching control (supports DiSEqC). The Dreambox 8000 also includes OSD in many languages and skin-support and a Videotext Decoder. It runs on an external 12V power supply.

Because the Dreambox 8000 offers so much, and is available at very reasonable prices, it has become one of the leading satellite receivers in the world. The system is made of extremely high-quality components which allow it a long service life. Even though the Dreambox 8000 is made of superior components and offers a huge range of functions, it is also very easy to set up and to operate. This is a major benefit that this system offers its users which cannot be said by many other brands of receivers that are currently on the market today.

Its superior construction and advanced technology also makes it very robust and powerful when it comes to finding signal. Again, this is something that many other brands cannot boast of providing to their buyers and users. In simple terms, the Dreambox 8000 provides all of the functions and services that its owners desire and demand in their systems.

To learn more about the Dreambox 8000 or other products such as Dreambox 800 HD, DreamBox 500, DreamBox 600, simply visit the satellite finder online store [Dreambox-8000.com](http://www.dreambox-8000.com). This is an authorized dealer and they are known for providing high-quality equipment for the Dreambox target market at an affordable price. With this online company, visitors do not have to take chances on buying inferior products or paying too much for their Dreambox equipment or component parts. The site is organized and laid out neatly, making it very easy for visitors to find exactly what they are looking for.
