What You Need to Know About Castors and Trolleys by [Wagen Manufacturing](#)

Article published on August 10th 2012 | [Business](#)

What is the use of advancement in technology if it doesn't help to make human life easier. Technology has led to revolutionizing many aspects of the civilized world, with all industries profiting from the latest technologies. From the easy production of large volumes of products, to carrying around heavy equipment, everything is now a lot easier than it was a few decades ago.

One area that has benefited is the castors, trolleys and materials handling equipment industry. This type of equipment is basically used to make work easy. There are commercial trolleys that are used in factories to carry around raw materials and finished goods, or in some cases may also be required to carry heavy equipment. Using the right kind of castors, and materials handling equipment can greatly reduce the human effort required for the task. The best part is that the industrial castors used today are engineered in a way that makes them durable and efficient with quality material, so the castors and similar equipment have a longer life.

You may not realize it but, trolleys are widely used in the hospitality industry too. You may find sub-categories like- front of house, housekeeping, laundry, functions and back of house trolleys etc. When talking about are house equipment, we may talk of " scissor lift work table, light multipurpose hand trolley, medium heavy general hand trolley (dished back), pallet truck, refrigerator/removalist hand trolley, drum decating rack, industrial platform, hi load platform, folding platform and appliances hand trolley etc. Laundry trolleys include- soiled linen, plastic scissor, mobile tub with binsert, mobile tub, tub bin, jumbo trolley, linen storage, mesh basket, linen storage- no back, scissor bag light duty, security cage.

When talking of commercial trolleys, we make talk about- clearing, folding platforms, Ruxxac folding hand trolleys, solicitors court trolleys, traymobiles, order picking, chair trolleys, removalists, eco mails, Clax folding cart, document trolleys, and eco security trolleys combined with Industrial castors and wheels too are an important part of materials handling equipment. No matter what kind of a trolley you use, you also need good quality of castors. The castors that you use should be able to work equally well in high or low temperatures, should be corrosion resistant and have frames made of stainless steel. You can easily look for castor wheels and related materials online as there are a number of websites offering good quality castors and trolleys at great prices.
