Article published on May 28th 2012 | [Business](#)

In the recent years it is seen that there is a craze for Green Living which is considered to be a welcome change. There are hundreds of green gadgets that are formulated and are up for sale each year. Each one promises to save on your energy bills. With the increase in prices in energy as well as chilly winters you will definitely plan to save a little with every possible watt of energy. But, after you are done with certain changes for example insulating homes and blocking draughts you might be left with thoughts what more needs to be done exactly. Luckily there are many energy saving products that are easily available in the market. These products will give you due value for money but also they will lead to further energy savings. Thus, one of such products is energy saving jacket.

Energy saving jackets for the water tanks should be draped around the water tank. It will reduce the amount of energy that is basically made use of to keep the water hot during winter months. These energy saving jackets will reduce the heat loss up to at least 75% and save a fair amount of money. But you should ensure that the product is bought from a well reputed company. For energy conscious home owners there are several vital items. Therefore, you need to make a judicious preference. You can always opt for it in Cordtape.
