With over 20 years experience in the machine tools market T H Machine Tools is a name you can trust! by [Mary Porter](#)

Article published on June 26th 2012 | [Business](#)

Machine tools are basically machines for shaping rigid materials such as metal usually by cutting, boring, grinding and shearing, they are therefore a very important part of almost every manufacturing and production company!

T H Machine Tools, based in Hartbeespoort, South Africa and incorporated in 1992 are a well established and well respected company specialising in the sale and maintenance of new and reconditioned machine tools covering everything from drilling machines to lathes. With our wealth of experience in the machine tools market we have gained a well deserved reputation for our high quality goods whether they are new or used, as well as being well known for our excellent customer satisfaction which is second to none.

Our aim is to provide machine tools at the most competitive prices , we believe a pre-owned machine is a great option giving customers the opportunity to buy a superior brand of machine tool that would otherwise may have been too expensive for their budget. We have a dedicated team of highly trained specialist technicians who put every machine tool through rigorous tests to ensure our customers are getting the best possible equipment. Excellence to us comes as standard.

We update our stock on a daily basis have a look on our online catalogue, we have a comprehensive stock list and a great variety of much sought after quality lathes. We keep a huge quantity of machine tools as well as spare parts to eliminate any delay in our service. Our delivery and rigging service ensures lathes etc are delivered and ready for operation in the shortest time possible.

Have a look what is on offer today or if there is something in particular contact us and we will do our best to source it for you.
