Features of Men's Dress Shirts by [James Blee](#)

Article published on January 24th 2012 | [Clothing](#)

Dress shirts are an important part of men's formal wear and a lot of importance is given to them as they are used as official wear, in parties and get-togethers, seminars, and conferences and others. Since, they occupy an important section of the wardrobe and are required in plenty, it is necessary to go for cheap dress shirts that are affordable and of good quality.

Dress shirts can be both tailored as well as ready made. However, it is important for us to understand what really makes a dress shirt different from any other shirt available in the market. Its basic features are enlisted and discussed below:

• The primary point of differentiation is the use of buttons. In case of dress shirts, the buttons usually open in the middle and are stitched from the collar to the waist. Almost all tailored dress shirts, regardless of their size, have at least seven buttons in the front. In rare cases, shirts feature buttons on the cuffs and collars, depending upon the demands of the customers.

• Every dress shirt has a collar, although, the style of those collars may vary. There are various types of collars like Windsor collars, Straight collars, Tony collars, and Button Down collars. In case of tailored shirts, the customer chooses the collar of his choice.

• Cuffs are also an important feature of dress shirts. Cuffs are the wrist covering portions of the shirt. There are two basic kinds of cuffs: barrel cuffs and French cuffs.

• Pleats and plackets are the other two features of the tailored dress shirts. Although pleats are not a universal feature as the tailor only puts it upon the recommendation of the customer..

Thus, a properly tailored dress shirt must have all the above mentioned features. Moreover, it is also important to find cheap dress shirts which are affordable, cheap and of excellent quality.
