Apple Lunch iTV Project with Best Technology by [Richard Marsh](#)

Article published on January 9th 2012 | [Communication](#)

The leading mobile companies try to give the best to their consumers so that they are remembered for their innovative gadgets. Apple held a meeting with the media executives regarding its strategy over iTV. The company believes that launching iTV would bring a revolutionary change in the small screen world and most probably Apple would turn out to be the largest broadcaster of United Kingdom. The iTV would be constructed on the basis of Apple TV theory and it is estimated that it would contain a screen also.

Moreover iTV would attach directly to other devices. By this it means that that you may able to watch the movie or any show from that part from which you left and switch on to other device. For Apple iTv rumors are widely spread that this superb feature set would fetch motion antenna and voice technology like Kinect which forces you to flourish your arms at your TV set and also makes you believe as a Tom cruise. Also Apple would be coming up with its new Apple iTV in the year 2012 and would be available in three sizes among which one is of 32â€• and other is of 55â€•.

The Apple iTV possess an original processor which is accessible in ipad 3 which is still in the pipeline yet to be launched in 2012. The software has a complete new boundary which help the users to change the programs by using voice commands that means with the help of Siri personal assistant app that is available in iphone, ipad and TV. According to the views of the Japanese company who are manufacturing this Apple iTV said that this 55â€• model would compete the innovative TV of Samsung and LG who possess an inbuilt processor, OLED display and Super HD technology.

This fantastic iTV would be going to be launched in the early 2013 and this incorporated television set is very straightforward to use. It carries a very usual remote control but the actual remote is Siri. So your own voice is the actual remote control. But you need a cable TV connection or dish TV because would not provide this facility and the prices of this TV would be double from an existing iTV.
