Benefits of employee timesheet and payroll tracking software

Timesheet software integrates the functions of project time tracking and payroll billing. It helps managers or human resource departments track payroll process, lower management costs, and automate billing and invoicing in an easy way. A small business owner can manage a simple task by using timesheet templates in an Excel program. Or he can choose professional employee tools to deal with a more complicated situation. These tools include commercial timesheet software, online web-based services, and free timesheet tracking software and services.

Commercial electronic timesheet software usually costs from tens to thousands of US dollars, which depend on the difference of software companies, software editions, and the numbers of employees. TimeFlow is time clock software and project time tracking software. With it, employees can view their working hours and create their daily, monthly, or weekly timesheet reports. It is priced at \$89.95 – \$1,919.95 depending on the numbers of users and the types of technological supports. Streamline your payroll process by cutting the time it takes to capture timesheet data by 50% or more. Significantly cut payroll processing costs by eliminating "double data entry" and the need for rework and corrections. Track exempt employee time off hours automatically from approved and scheduled time off requests. Speed up payroll processing by two to three days through electronic data integration.

In economic environment, businesses must work harder than ever to minimize operating costs. UAttend™'s employee management solution plays an instrumental role in helping businesses stay competitive by improving organizational efficiency and productivity. With our time clocks, uAttend has revolutionized the way employee attendance tracking is managed by the payroll department. Our sophisticated and user-friendly time and attendance software creates and delivers detailed reports on employee attendance and work hours to managers which help to highlight any organizational inefficiencies and productivity concerns.

Our cloud-based solutions operate on an SaaS (Software as a Service) model that can be implemented for a minimal monthly subscription. Additionally, our time and attendance software does not require any installation or downloading. Set up is quick, easy and hassle-free. All uAttend employee time and attendance tracking products are "Plug n Play", making them the first choice of business owners who do not have time for complex software downloads or installation. Setting up our time clocks is simple with our California-based support staff available to help you with any questions you may have. If you're considering a time and attendance tracking system for your employees, look to uAttend as your service provider.

Employees enter time and pay data through desktop browsers, web-based time clocks, IVR phone time cards, or mobile devices. Policies and rules engine validates timesheet data and time off requests. They then submit timesheets/time off requests to their managers for approval. Validation rules ensure exempt employees account for 40 hours per week, or will not allow an employee to "go negative" on his vacation balance. Payroll managers run custom reports on overtime, custom pay codes, sick and vacation and other leave. Payroll integration module sends time and pay data to payroll.
