Find out Magic Combo and Important Spells on TERA Sorcerer Guide by [Vernon Z.Vencent](#)

Article published on April 2nd 2012 | [Computer](#)

TERA Sorcerer is the individual in the party that is typically responsible for dealing out the most damage with multiple enemies. While a Sorcerer is significantly less well-armored than a Warrior or even an Archer, they are capable of killing monsters and dealing magnificent AoE damages. If you would like to cast TERA Sorcerer Spells for the most effective, TERA Sorcerer Guide is the best source to read. Here are some tips to get you started.

First, remember that the enemy's attention should never be on you. Let the Warriors or the Lancers head in first, and give them a few moments before you start letting go with your spells. This ensures that you never draw the enemy's attention and that you are going to be able to do your job smoothest.

Some of TERA Sorcerer Skills have to force the enemy into a certain configuration. For example, if you want to use Ice Needle, which is one of the first spells that you learn, wait until the enemies are lined up in front of you. Not only does it do a fair amount of damage, you'll also be able to slow the enemy significantly. This is an important technique if you are soloing.

When you are playing in a group, you'll be using both Time Gyre and Flaming Barrage fairly often. Time Gyre is a good choice when you want to slow the enemy down. If you notice that they are hitting the tanks very hard, while TERA Priests are having trouble keeping up, use Time Gyre to keep things going. Similarly, Flaming Barrage is TERA Sorcerer primary tool kit. It allows you to do damage to a number of different enemies at once. Fireblast works in very similar fashion.

Also remember that as TERA Sorcerer, you are very terribly weak and vulnerable. Your character wears cloth armor, the flimsiest armor in the game, and you are also the slowest class in TERA. However, you have several ways to get out of trouble when you have inadvertently drawn too much attention or enemies get too close to you. Use both Glacial Retreat and Teleport Jaunt to pull yourself out of harm's way before attacking again, in which you can learn more about strategies that keeps you staying away from danger from TERA Sorcerer Guide.

Learn to use your TERA Sorcerer Spells in conjunction with one another. It can be called "Magic Combo". For example, slow the enemy down with a Mindblast or Time Gyre, and then use Fireblast, which deal the enormous damage but have a long time cast. This ensures that the largest number of enemies stay in your blast radius.

TERA Sorcerer is the best DPS class in TERA Online. The Sorcerer can perform huge damage to both single target and multiple targets. However, this class is the most vulnerable one too. Without strong armor and survivability, the sorcerer is the first class targeted in PvP. Special techniques and movement have to perform well in order to keep this class alive in which you can learn by reading TERA Sorcerer Guide.
