Free Icons for Windows Phone 7 by [Jack](#)

Article published on March 8th 2012 | [Computer](#)

Today, more developers are involved in applications for Windows Phone 7, and they are challenged to create toolbar icons that comply with the standards that are valid for Windows Phone 7. An icon to be valid should be 48 x 48 pixels with the content centered on a 26 x 26 pixel area on the icon. Because toolbar icons can be used with any theme of Windows Phone 7, they should have transparent backgrounds and drawn in white.

If you need some free icons for WP7 maybe you can find a few to use for one or several WP7 applications. However, as a developer responsible for creating applications for a fast emerging market, you should be focused primarily on quality of toolbar icons that you would like to download. Professionally made and quality icons will make you stand out among your crowd of competitors.

There are some ways to get free icons for WP7. You might want to design the toolbar icons yourself. BUT, if you do not have the drawing skills, the task could be a difficult one. Another method is to get the help of search engines and get the icons free of charge. Many people who have drawing skills managed to create free icons for WP7 and put them on the internet to be given free to those who are interested. The problem with these icons, however, is their quality. If you look at these icons closely, you can notice inconsistent colors, rough edges and blurry appearance in the smaller sized icons. These problems are not present in icons done by professionals. The thing is, professionally crafted toolbar icons are not usually given free of charge. Not usually. This means you can still find free icons for WP7 that are good quality.

When you develop software, you are faced with a serious task. You need some skills, thought and a good set of toolbar icons. You need them to use for buttons, etc. Icon images for Windows Phone 7 are available in size 24 x 24 only and in 2 color schemes : 256 and 32-bit colors. They can be delivered in any file format: PNG, BMP, GIF, & ICO, and are available for immediate free download. All offered free icons for WP7 are licensed. This allows you to use these icons freely for any commercial and personal purposes, for example, software interfaces, blogs, online services, templates, and more).

There are some toolbar icons that are made and released by the Windows Phone 7 developers and are also offered for free. These are a collection of unique icons that are made for graphic development. These icons were made with the right size, color and perfectly centered content areas.

However, if you don't really trust the quality of free icons for WP7, you can always find icons done by professional designers, like the Metro Icons for Windows Phone 7. For just \$49, you can have the professionally designed icons that offer you a recognizable interface.
