Gadget of the moment â€“ iPhone and its apps [Floyddarcy](#)

Article published on December 5th 2011 | [Computer](#)

iPhone is the talk of today when it comes to phones. The reason is because of its state of the art functionalities that are incorporated into it. Apart from these functionalities, several apps are being released frequently which can be downloaded to the iPhone. These apps are devised keeping in mind the day-to-day needs of everyday users. The applications belong to a variety of categories such as music, games, news, lifestyle etc. The iPhone best application as of today appears to be the game called Angry Birds (which is also available for iPad). The game is addictive and has wooed players from all and every age group. Another iPhone top app is the Siri assistant who can answer any question you ask. The assistant is capable of sending messages, setting up appointments and telling you the best route to a specific destination. A defense game that goes by the name Plants Vs Zombies is also iPhone top application that needs the player to protect his/her house from zombies by using plants for protection.

1Password is also considered to be iPhone best application despite its hefty cost of 9.99\$. This iPhone top app enables the users to store their usernames and passwords for several websites on the iPhone. With this app, users can get automatically logged into any website they want with just a single tap. So, a user no longer has to remember username and password for every website that he/she constantly uses. If you are interested in playing word games, then Words with friends is iPhone top application that you must consider. It is similar to Scrabble and can easily please any person who is a word fiend. You can pause this game anytime and resume it later, which makes it so much easier to play on the go as and when you wish. You can play this game with your friends or alone; itâ€™s totally your call.

If you are more of a photograph kind of a person, then AutoStitch Panorama sure is iPhone best application for you to consider. You can use this app to combine multiple photos ranging from 2 to 20 into a single photo. You can also share the photo automatically through Facebook. MusicID With Lyrics is iPhone top app in the music category. This iPhone top application helps you to solve any identification issue you may have with any of the songs. You can find artist, title or words to any song that you want to with this app. It will also provide you with artist biographies, if present, along with YouTube videos that are associated with your search. So, you no longer have to rack your brain for any information related to music when you have this app on your iPhone.
