How to recover Windows password on Toshiba Satellite by [Ander Winger](#)

Article published on June 4th 2012 | [Computer](#)

Q:What's the simplest way to reset my Toshiba laptop password?

I have a Toshiba (Satellite 1805) laptop but I forgot the new password that I JUST put on it!!! There's only one user account, which is the administrator, i.e. the password I can't remember. I don't want to have to reinstall Windows 7 onto it. What can I do to log onto my computer!!!!!!!!!!!!!!?!

It is a question collected from Yahoo Answer. For Toshiba Satellite laptop data security and personal privacy, you may have to create a strong password that is easy-to-remember yet difficult-to-guess. But have you ever met with the similar trouble? How to recover lost Windows password if it happens to you? Should you know if you installed Windows 7 as the user asked above question on your computer, it's indeed difficult to recover Windows7 password. In this case, you need to recover lost Windows password with Windows password recovery tool.

Windows password recovery is special software to change lost or forgotten Windows password. The password recovery process is easy and safe without any data loss. Whatever your Windows OS is Windows98/2000/XP/Vista/7 or Windows server2003/2008. It can help you fix your lost Windows password in minutes.

How to recover lost or forgotten Windows password with Windows password recovery tool?

- 1.Download and install Windows password rescuer professional on a computer connected with network.
- 2.Create a bootable CD/DVD driver or USB flash driver. (USB flash driver is recommend)
- 3.Restart locked computer and set it boot from CD/DVD device on BIOS.
- 4.Insert the burned CD/DVD or USB flash drive into the locked computer.
- 5.Select a user account to reset its password and click"reset password" on the user list.

Note: Your Windows 7 Admin password has been reset as blank, so you should not input the admin password when you login computer with Admin account.
