The latest Microsoft Office 2010 encompasses wonderful tools and features to let you work better. This is the pioneer one to bring free online versions of Word, Excel, PowerPoint, and OneNote, that can be accessed over leading web browsers including Internet Explorer, Firefox, Chrome and Safari. The suit is available under three editions, viz. Office Home and Student 2010, Office Home and Business 2010 and Microsoft Office Professional 2010. Microsoft extends the support for Mobile platforms, and Office Mobile 2010 in compliance with Windows 6.5 or Windows 7 phone is the ultimate solution if you don't want to limit yourself. Ribbon interface is a common feature available with every component including Word, Outlook, OneNote, Publisher, InfoPath, SharePoint Workspace (previously known as Groove), and the new Office Web Apps. Effective text and photo editing tools are to accentuate the visual impact into your documents or presentations. Sparklines in Excel is to help you with the intuitive presentation through mini-charts so that audience can have a quick glance for various key-information. Use Slicers to dynamically segment and filter PivotTable data to display precisely what you need. Windows Live SkyDrive is another captivating feature empowering you to work round-the-globe, whenever you want.

Subtle issues have been noticed while installing, activating, updating and configuring the software. Errors such as "Invalid product key" or errors associated with numeric codes for instance "0x80070001" and "0x80070005" are quite common with the installation process. To avoid such problems you can check your product keys and make sure that it is entered correctly and at a right place. Sometimes previous Office version available on the machine can be the crux. You can fix computer problems by removing it through the Windows Control Panel or following a run command with "appwiz.cpl". Locate the older program and remove it. Software problems may also come your way while you try to update the Microsoft Office 2010 with the latest service pack. Error code 0x80070646 and error code 646 means that the Windows Installer is facing problems. If you encounter the errors "Symptoms" then it indicates problems with the Windows Registry settings.

Navigate through the PC Help articles available with Microsoft Support portal, you can search with the error messages and find the desired solution. Editing the registry brings considerable risk for your machine, so taking a backup is recommended. Or speak with their technicians if not comfortable with computer troubleshooting on your own.

Vibrant and reliable computer technical support is also available from third-party vendors. However, bit vigilance is required from your part. Before you go for support make sure to go with their "terms and conditions" or Privacy policy. Portals running under Microsoft Certified Network Partner scheme are of great advantage, as they deploy experienced and certified technicians. Moreover you are protected with their comprehensive package covering all versions from Microsoft Office, Windows, Internet Explorer, and third-party applications. Once, you become a part of such network you have nothing to worry, as professionals are always standing by you through the secure Internet connection.
