Automatic Hand Soap Dispensers: Heights of Advancement by [Kailen Jhon](#)

Article published on August 3rd 2012 | [Customer Service](#)

Yes, this is really true! Automatic hand soap dispensers are the heights of advancement for just think of the way in which this device operates and offers people to remain hygienic and clean. There are the soap dispensers available in the market but the automatic hand soap dispensers are like the icing on the cake. It is this Touchless feature that makes it all the more hygienic as it ensures a sterile environment. Germs are bound to spread when there is physical contact with the dispenser and another person holds the same. But, in this Touchless concept, nobody is handling the soap dispenser at all. Even if there are a number of people handling the soap dispenser, they are not going to physically touch it and hence there will be no room for the bacterial colonies to breed and spread from there on. Transmission of bacteria is completely eliminated in this manner.

When we have the automatic hand soap dispenser, one can preset the increments in which the soap is dispensed. That is the advantage such kind of automatic soap dispensers bring along. They will distribute a certain amount, a preset amount, of the soap for single activation of the soap dispenser. The automatic hand soap dispensers also extend the same versatility to other liquids as well and they include laundry detergent, lotion, hand sanitizer and soaps too.

The users place their hands under the nozzle of the dispenser and in front of the sensor which gets activated. This will further bring about activation in the pump which gives out a premeasured quantity of soap through the nozzle. There are different types of sensors that will bring about the activation and they are radar based or photo sensors or passive infrared sensors too. Supply Line Direct is an online store that houses different types of automatic hand soap dispensers and GOJO soap dispenser is one popular choice.

GOJO soap dispenser is available in different quantities like 800 ml, 1250 ml and 2000 ml. These soap dispensers are ideal for locations where a traditional dispenser is the most preferred choice. And the store also has refills option and hence it is very convenient for the buyer to buy the soap dispenser as well as the refill. There is also the ClearVu foam-eeze bulk foam soap dispenser which is ideal in places where there is a lot of traffic. This large capacity reservoir is capable of providing 30% more soap when compared to the other soap systems. Therefore, depending on the kind of necessity and traffic that exists at the place one can choose the soap dispenser and put it at the appropriate and convenient place.

The soap dispensers come in with antimicrobial soaps and lotion soap which gives the users a gentle hand wash so that they can get rid of the grime, dust and dirt that got stuck on the hands. These lotions also come in with moisturizing ingredients that leave a soothing and soft feeling on the skin. Browse through the catalog that is present on the website to identify the soap dispensers that will fit your requirements perfectly.
