Quick and Easy Sail out from Frequent Internet Issues with HP Computer by [Jack K Wilson](#)

Article published on December 21st 2011 | [Customer Service](#)

HP holds a legacy of trust and reliability, and not surprisingly, it comes through consistence, honest and relentless approach. HP works to make technology simpler, accessible, secure and cost-effective so that it can serve humanity in a better way. HP product spectrum is quite broad and includes all vibrant colors to give context-aware experience for a connected world. Whether you crave for daily computing or looking for business solution, HP has a solution for your customized world.

With a global market, HP Customer Support has a big responsibility to deal with. Thankfully, it has been meeting customers'™ expectation every time. You get a range of support options, available through knowledge-base, e-mail, chat or remote-screen sharing. You can get assistance regarding HP computer setup and installation, printer setup and networking, PC optimization, software installation and upgrade, viruses and spyware removal, and more. HP Support Forums is portal to collaborate with peers to share experience regarding HP products for mutual understanding and benefit.

Learning troubleshooting tips can be of great help. Go ahead to know how to fix frequent Internet issues with HP computers/laptops:

Error "Video is no longer available" on YouTube :

If you are unable to play a video on YouTube, and getting error as "Video is no longer available," then there is something wrong with your antivirus software. You can check it by turning off temporarily. Update, upgrade or customize the console settings of the security software. Restart the browser to make the changes effective.

Adobe PDF issues :

If PDFs are not opening properly on your HP laptop then you may update the Adobe Reader and modify the settings. Uninstalling or reinstalling the product can also check the issue. At times, you can perform the repair task as follow: Help > Repair Acrobat Installation. Similarly, in Adobe Reader, go to Help > Repair Adobe Reader Installation.

Webpages load slowly or don't load at all :

Don't™t blame HP for it. Try using different browsers, if it happens with all then there is something wrong with that particular website you are looking for. Multiple reasons could be preventing webpages from loading quickly. Check your antivirus and firewall settings and use your security software to scan and remove malicious software if any.

"Webpage cannot be displayed"™ :

This is the most common and annoying error message, and the browser may stop responding. There can be various issues, the user account can be corrupted, system software may be infected by viruses or there can be other hidden reasons related to browser compatibility and settings. Speed up your browser deleting history, temporary Internet files, cookies, form data, and stored passwords. Also, implement privacy settings and Pop-up Blocker settings, and disable add-ons.

What, unable to fix HP Internet issues on your own? Don't get panicked as HP Technical Help is not too far. Call experts on phone or raise an online support request, and you will find experts coming to your rescue in no time. They can troubleshoot your HP machine virtually to leave behind a smooth running PC.
