Article published on August 10th 2012 | [Customer Service](#)

Technology is changing at a tremendously fast rate in every business sector, now it is essential for everybody to update themselves according to the new trends. So, that they can stay ahead in this competitive world. Samsung Smart Window screen is the latest example of the modern technology. This device turns your window into a transparent interactive screen and this technology is taking your business to a completely new level. And this technology also plays a very important role in gaming entertainment sector. It is basically a dual purpose screens that provides both home viewing and computer games or videos. Most of the consumers have their interests in this technology and ready to buy this transparent screens.

After the launch of Samsung's transparent smart TV plus, it has been noticed that many people are interested in this technology and wants to buy this unique screen for themselves. World's most popular game Angry Birds are also play on this screen and the crowd started to jump towards Samsung's showrooms to get a demonstration of the world's most popular game in a gadget developed by world's most popular company Samsung. Many different games are played on this Samsung transparent LCD. This Samsung's Smart TV ES9000 has inbuilt sensors which detect your gestures and the playing of the game becomes more exciting. This modern technology does not have the phosphor dots present in Plasma TV, so colors are not created by using filters and you have no need to worry about burn in problems. And this thing made a transparent LCD screen good for playing video games.

With the amazing and unique features of Samsung transparent LCD many consumer wants to buy this TV. There are companies available online who sell and builds transparent display screens to their customers. Main feature of this screen is that it is very cost efficient because of their low energy consumption. As you know, games are a very important source for entertainment. It is very good source to kill your boredom and help you to make your mind refresh. With the help of transparent screen, if you are watching TV and want to play games you can easily play it on your TV with this new transparent screen technology. Here you can play any type of game like action, funny, puzzle, arcade, fighting, racing and many more. Samsung LCD screen are available in various sizes like 22 inch, 46 inch, etc.

So, Samsung transparent TV plays a very important role in gaming entertainment. And this screen can be used both as TV and as computer also where you can use various applications like, Facebook, twitter, etc. And it connects you and your family in and out of the home, and offer amazing new content options personalized to your lifestyle and needs. Your kids are also stay busy in playing games on transparent LCD screen. This is really a ultimate source for entertainment.
