Your Calibration laboratory with certification iso by [Jacob Eletto](#)

Article published on March 29th 2012 | [Customer Service](#)

The competency of any calibration laboratory can be illustrated by en ISO IEC 17025. It is very important that before hiring any calibration laboratory services, you ensure that it is fully accredited en ISO IEC 17025. Certification ISO is only a piece of paper but it provides substantial evidence of the quality of service of any calibration laboratory. En iso iec 17025 is a standard that need to be followed by all laboratories specializing in testing and calibration. 17025 ISO was first published in 1999 by the International Organization for Standardization. Laboratories with en iso iec 17025 follow its standards to better their service and provide valid results to clients.

Several accreditation bodies have been established in U.S., one of which is the A2LA - American Association for Laboratory Accreditation. The A2LA provides all accreditation services and offers for calibration, testing and other similar laboratories. Laboratories have to fulfill the evaluation process before they can qualify for certification iso. A laboratory with 17025 iso not only has the technology to meet calibration requirements but also owns a team of expert individuals who are well versed in all calibration services. Some of the certification iso calibration services that you might be looking for are storage tanks, truck sale, clean rooms and several kinds of measurements equipment.

Calibration laboratories with 17025 iso are of special importance to industries that frequently need to test their equipment. Some of these equipment examples are ammeters, scales, pipettes, calipers, gauges, hydrometers, weights, multimeters and several others. As you can see this equipment is commonly used in test labs and industries such as health, electronics, construction and engineering. Of course, these are only few of the examples among an extensive range of services provided by the calibration laboratory.

A calibration laboratory with certification iso has quite a lot of experience in the field. They have fully qualified employees and advanced technical assistance. All of these factors are one of the main reasons why you should select a calibration laboratory with 17025 ISO. In fact, when you require any such services, certification ISO can act as an important search parameter. En ISO IEC 17025 is why so many clients are able to trust the services provided by a calibration laboratory. So, the next time you wish to get your instruments calibrated, opt for a company with certification iso.

certification iso, en iso iec 17025
