The Many Selections of IPAF Training Programs by [Czeslawa Wakefield](#)

Article published on July 10th 2012 | [Education](#)

There are many IPAF training programs which those interested in height related works or careers. Most IPAF courses are short to accommodate the busy schedule of the candidates as construction and building works are rampant in the name of development.

Course Variants

Some popular IPAF courses include Scissor & Boom course, Scissor Lift course, Cherry Picker course, Static and Vertical boom courses. One of the more popular IPAF programs is the MEWPs course.

The MEWPs course is the mobile elevating work platforms program which is the operator training program to handle any mobile elevation platform machineries. This popular one day IPAF course is well attended as it is widely conducted by 500 approved centers across the world.

After the successful completion of this MEWPs program, the graduate would be able to carry out their responsibilities properly and safely at height-related works.

Successful candidates would also be awarded with the coveted IPAF certificate and identification card which warrants for 5 yearsâ€™™ validity. There would also be an Operators Safety Guide by IPAF along with its PAL Card log book.

Requirements

These IPAF courses are structured to meet the Work at Height Regulations which insist on competent workers at the high places of work to ensure safety in a construction or building job. That competent individual must have the proper and relevant training which offers the right and latest technical knowledge to apply correctly at the work site.

IPAF training and qualifications are well recognized and widely accepted all across the globe. Its prestigious training programs are certified by another prestigious agency, the TUV, while conforming to the coveted ISO 188878:2004 international standard for MEWPs courses.

The course candidates must follow through all aspects of the IPAF course to qualify for the IPAF award. They should undergo the right IPAF courses through approved IPAF training centers where there is the relevant expertise to conduct the courses. There would be the availability of the best training environment to fulfill the course requirements such as the latest training techniques, information and methods which are up to date with the industry and legislation changes.

Career Path

Any interested candidate on work at height environments for successful career opportunities can consider basic to advance IPAF course trainings which are available in the market. These include the IPAF operator training, IPAF Demonstrator course, IPAF loading and unloading program and others.

One can work their way up from entry level IPAF courses to supervisor and manager level IPAF courses.
