Why Summer Training for B.Tech Students in Noida by [Ashutosh Kaushik](#)

Article published on March 12th 2012 | [Education](#)

The main reason behind practicing summer training is to have a sound technical career in future. Every engineering students wants his or her future to be secured enough and strong technical background works as the foundation stone in shaping up a healthy technical career. And everybody knows that summer training is the best of all option available for building up a strong technical base.

But, in fact summer training is just not enough for a smooth career ahead. The another crucial factor is the location from where students are doing their summer training. Summer training should be done from a place which is industrial enough, because students in industrial cities have more chances of getting placed then students in other cities. Noida is one such location for practicing summer training. The logic behind this is noida is the biggest IT hub in the northern India and other core company are also residing in the noida region. The other industry based cities like New Delhi, Gurgaon, Gaziabad and other are at nearby distance from noida. In other words, we can say that students pursuing their summer training in noida can easily grab career opportunities in whole delhi ncr region. Moreover, training company in noida and other delhi ncr region are much more better and advanced in every aspects as compared to other training companies in any other part of the country. As top training companies in noida are not just training organization but these companies also deals in development and placement services.

The main benefits of practicing summer training at noida in these top training organization is that these organization gives opportunity to the students to assist senior programmers and experts on their live client projects which they have to deliver within a certain dead line of time. And to work on live project at trainee or intern level is not a cake walk, one must have strong technical fundamentals to corporate with expert while assisting them. Students learn a lot during this summer training as they have to develop and deliver project to client on time and have to work for long hours for these project work. While working on these live projects students develop strong technical skills on their interested technologies and also get rid of fresher tag from their resume.

These top training companies also provides placement assistance services for their summer training interns and trainees as these companies have tie up's with other leading companies where these companies refers their students for job perspective as companies having tie up's with these top training companies trust the quality of the company and also knows that candidates from these training companies are capable of producing extra ordinary results for their company.

In short, we can say that summer training should be done from a suitable location so that students can make maximum out of their summer training programs and can get placed in good organizations. Summer training also free students from their final year project work as after completing their summer training these companies provides students with certification ensuring successful completion of their final year project during their summer training only and also provides other important documents like synopsis and etc.
