Protection of family members from diseases is desired by all. Do you reside in an area where TDS (total dissolved solids) level in water is high? If yes, are you using an RO water purifier? If your answer is "no", your complete family is at risk. 80 percent of the existing diseases on earth are caused by consumption of unpurified H₂O. You and your family members must have already suffered from water borne diseases. Start your journey towards a healthy life using Eureka Forbes Aquaguard water purifier. Eureka Forbes has numerous models of RO systems. Every Eureka Forbes Aquaguard water purifier helps in the elimination of disease-causing pollutants such as micro organisms, dissolved particles, harmful chemicals, and other new-age tough contaminants.

It is worth mentioning here that consumers do not think twice when buying a Eureka Forbes Aquaguard water purifier. This is because Eureka Forbes has maintained a track record of delivering the best for thirty years now ever since its inception in the year 1982. The same drive continues with added zest. What you always get no matter which Eureka Forbes Aquaguard water purifier you use is a blend of advanced technology, innovation, superlative quality, and purification effectiveness at their best. View the complete range of products at [eurekaforbes.com](#), the company's corporate site. The list is huge. You will come across numerous models categorized under types.

One Eureka Forbes Aquaguard water purifier under the RO category noteworthy is AquaGuard Reviva Total. It is priced at Rs. 10,990. You can book it at the company's corporate site for Rs. 2000 and pay the rest of the amount by cash on delivery. There are a number of features, which makes the AquaGuard Reviva Total one of the best selling purifiers from the house of Eureka Forbes. Here are few of the features:

• The key component in an RO purifier is the RO membrane. Effective membrane performance matters for flow of absolutely pure and safe H₂O from the faucet. AquaGuard Reviva Total comes with a unique membrane cleaning system, ensuring superior and effective membrane performance

• Growth of water-borne disease-causing bacteria, viruses and protozoa is inhibited with silver impregnation. This silver surety technology enhances purification efficiency as well

• Enhanced booster pump in this Eureka Forbes Aquaguard water purifier helps H₂O flow through the membrane with high pressure, facilitating constant flow

• You will never run short of pure H₂O as it comes with ample storage capacity of 8 litres

• Tamper-proof reject water valve in the AquaGuard Reviva Total ensures continuous and steady reject water flow. Membrane surface thereby gets automatically cleaned. The rejected H₂O can be collected and reused for other purposes.

• Protection of your RO system is guaranteed. The pump in AquaGuard Reviva Total will never run dry as it shuts off automatically if there is no input water

• The transparent tank in the AquaGuard Reviva Total lets you know about the available quantity of purified water in it.
