Beach Towels- Variety and Purpose by [Chris Adam](#)

Article published on January 2nd 2012 | [Fashion](#)

Spending a day on the beach is such a satisfying experience in itself. Seeing the waves and people diving straight into the water, sunbathing, and various other activities has its own place. However, due to sand, there is a problem of clothes getting full of it. A beach towel comes in handy to rid of this issue.

Beach towels come in usually large and smaller sizes. The size of beach towel is a significant aspect. Choosing a good-sized towel is very important. It can be doubled as beach bedding as well. Choosing small-sized towels is a very bad option as they have lesser fabric, which will not be able to absorb the water properly whereas large towels also makes us feel comfortable while lying on the sand. After size, it would also be wise to check the absorbency level of a towel. It is better to have a light weighted towel with high absorbency level which will ensure that the body gets dry quickly.

If we talk about the quality of the beach towels, it should be made up of soft materials. Towels made up of cotton and natural fibre materials are very high quality materials and is rated very highly when it comes to absorbing liquid, they last long. Beach towels come in various colours and designs. Multipurpose double sized towels are the most popular and it complements swimsuits and other beach accessories.

Being comfortable is very crucial when one goes out to enjoy on the beach. One should buy a beach towel which is comfortable for one's skin and should be able to absorb water which will be able to protect one from allergies due to moisture. Buying a good beach towel ensures that one will be able to enjoy himself without any worries of clothes getting dirty and will have something comfortable to lay on the beach as well.
