Company Car Leasing is a Better Option than Outright Purchase for the Shorter Term
by [Julia Roger](#)

Article published on June 30th 2012 | [Finance](#)

This is quite obvious fact that in day today's life, people require the services of cars. However, it is also an established fact that profitability is the main criterion of a business house. Hence, it is extremely crucial to do things in a cost effective way. Therefore, if there is a need for a car one can always look to do things in an innovative way. There always lies the option of outright purchase. However, if things have to be done in a cheap way one can always look up to the concept of company car leasing.

The concept of leasing allows the consumer to use the facility without having to purchase it outright. The lease is generally for a fixed period. If one is talking in the context of a car it is definitely better opting for leasing if it is needed for the short term. The amount of money to be paid as lease is definitely lesser than the amount one would have had to shell out as EMI. Besides, introduction of new models are a common feature among car makers. Hence, if there is a desire to shift to a new model one can always do so without having to shoulder the responsibility of selling the old car.

Hence, this is a viable option one can always look up to in need. If there is a need for a company car lease one can always contact many firms who are willing to do the needful. These firms also stand to gain as they can earn revenues without having to part with the ownership. Most of them have online presence, where one can simply log in and have a look at the large selection of vehicles on offer. One will find cheaper quotes when compared to the cars present there.
